Style #SSW01- Unscented

Style #SSW02- Scented

Sweat Shield® works through the day even through showering! Apply once at night after showering and you should be sweat-free by morning all day long for a few days depending on your body chemistry.

Sweat Shield® includes **TRIPLE LAYERS OF DEFENSE:**

- ① The Maximum Prescription Strength Wetness Protection Allowed;
- ② Skin Soothing Conditioners;
- ③ Odor Fighting Deodorant.

Our advanced and customized formula for hyperhidrosis was created based on years of experience dealing with consumers suffering with this problem.

Sweat Shield® safely and effectively treats hyperhidrosis and excessive sweating with a simple, once-a-week application. **Sweat Shield®** is a liquid formula, soaked on a soft, non-woven pad. Once a week before bedtime, open one of the packets and dab (do not rub) the disposable pad thoroughly under the arms within the hairline. Allow your underarms to air dry for a few minutes, and then go to bed. During the night when your sweat glands are less active, **Sweat Shield®** will safely form a block in your sweat glands that will last a week. It will not wash off, it does not leave any film, and you won't even know it's there, except that you won't be sweating. **Coming Soon; Ultra Sweat Shield X.**
